DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to an optical scanning device having a light source for emitting a light beam and an image forming apparatus using the same, classified in class 359, subclass 210.
 - II. Claims 7-12, drawn to an optical scanning device having a plurality of light sources for emitting multiple light beams and an image forming apparatus using the same, classified in class 359, subclass 204.
2. The inventions are distinct, each from the other because of the following reasons:

Invention I having a structure which is not required for the invention II and vice versa.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the fields of search are not coextensive, i.e. invention I requires at least a search in class 347, subclasses 257-261, while invention II does not, invention II requires at least a search in class 347, subclasses 233, 243-244, while invention I does not, restriction for examination purposes as indicated is proper.

Art Unit: 2872

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Phan whose telephone number is (703) 308-4810. The fax phone number for this Group is (703) 308-7722.
